

**Class: Antlers**

**Barndale Learning Plan**

**Term: 25/26 Autumn 2**

**Books to support our learning.**

### **Communication, Language & Literacy**

In this topic, we will explore different types of non-fiction texts, such as reports, biographies, and persuasive writing. We will learn how writers use facts, structure, and language to inform and engage their readers. Finally, we will create our own non-fiction pieces, using research and clear writing to share real information and ideas..

### **Science**

#### **Forces**

In this topic, we will learn about different types of forces, such as gravity, friction, and magnetism, and how they affect the world around us. We will investigate how forces make things move, stop, or change direction through fun experiments and observations. Finally, we will explore how understanding forces helps us design and use everyday objects, from vehicles to sports equipment.

### **PSHE**

#### **Celebrating Difference**

This term we will be answering the questions: Equality: what does it mean to me in the UK? What does equality in the workplace mean? What are the benefits of being in a multicultural society? Why is it important to challenge inequality.

### **Geography**

#### **Food, Energy and Waste**

In this topic, we will learn how food, energy, and waste are connected and why they are important for our planet. We will explore where our food and energy come from and how human actions can impact the environment. Finally, we will investigate ways to reduce waste and create more sustainable communities

### **Citizenship**

#### **Community and Volunteering**

In this topic, we will explore what it means to be an active and responsible member of our community. We will learn about the importance of helping others and how volunteering can make a positive difference. Finally, we will look at ways we can contribute to our own community and take action to improve

### **Numeracy & Problem Solving**

In this topic, we will practise using the four operations — addition, subtraction, multiplication, and division — to solve a range of problems. We will learn different strategies to work efficiently and check our answers carefully. Finally, we will apply our skills to real-life situations, showing how the four operations help us every day.

### **Computing**

In this topic, we will learn how to use **Scratch** to create our own interactive stories, games, and animations. We will explore how to use blocks of code to control characters, add sounds, and make things move. Finally, we will design and build our own Scratch project, using creativity and problem-solving to bring our ideas to life.

### **History**

#### **European History**

In this topic, we will explore the key events and causes of World War II, including how it began and the countries involved. We will learn about life during the war, both for soldiers and civilians, and how communities were affected around the world. Finally, we will discover how the war ended and the lasting impact it had on our modern world.

### **Physical Education**

In this topic, we will focus on improving our overall fitness through a variety of fun and challenging activities. We will develop our strength, flexibility, stamina, and coordination while learning the importance of regular exercise. Finally, we will explore how staying active supports a
