

Books to support our learning.

Communication, Language & Literacy

This term we will explore modern rhymes and poems. We will listen, join in, and repeat lines, noticing words that sound the same. We will clap, tap, and move to the rhythm, and use pictures and props to help us understand. We will also have a go at saying or performing lines using actions and voices to make the poems fun.

Science**Can you feel the materials and tell me what they are like?**

This term we will explore different materials. We will look at, touch, and feel materials to notice what they are like – for example, smooth, rough, light, or heavy. We will sort materials into groups based on their properties and talk about why we chose them. We will also use materials to make or build things, seeing how their properties help us.

PSHE, Enrichment & Ways to Wellbeing**How can we work and play together in school?**

This term we will learn about our school and ourselves. We will talk about places in school, people who help us, and what we like to do. We will also work together in groups, taking turns, sharing, and helping each other.

Our SchoolHumanities**Where is it and which way do we go?**

This term we will learn about position and location. We will look at where objects are – near, far, next to, or in front – and explore how to move them. We will also turn and move ourselves to understand direction and space.

We will use hands-on activities, maps, and objects to help us see and understand where things are in different places.

Therapeutic Input

Alongside any physio, SaLT, and Thrive sessions we will be working to identify tools that help us regulate and build our regulation toolkits.

Numeracy & Problem Solving

This term we will learn about shapes and their positions. We will look at different shapes like circles, squares, and triangles, and explore where they are – near, far, next to, or in front. We will move shapes and ourselves to learn about turns, direction, and spatial awareness. We will also touch, see, and play with shapes to help us understand their properties and how they fit together.

Computing**How can I control what happens on the screen?**

This term we will **explore using technology**. We will **press buttons**, to see what happens and **try different ways to control the computer or device**. We will also **take turns and have a go ourselves**, while exploring simple programs and apps.

The Arts**Which materials can we use, and how can we change them to make something?**

This term we will explore wrappers and paper. We will look, touch, and feel the materials to see if they are smooth, crunchy, foldable, or easy to stick. We will choose materials and fold, stick, and colour them to make our own creations. We will also think about which materials are best for cooking or crafting.

Physical Education**Can you show me different ways to move your body?**

This term we will explore dance and gymnastics. We will move our bodies in different ways, learning to stretch, balance, jump, and spin. We will also copy movements, create our own, and work with others to make sequences.
