

Class: Seahorses

Barndale Learning Plan

Term: Spring 2

Books to support our learning.

Communication, Language & Literacy

This half term we will explore stories from around the world while continuing to develop our phonics skills. We will listen to traditional and modern tales from different cultures, joining in with repeated phrases and noticing new and familiar sounds in words. We will use pictures, story maps, props, and role play to help us understand and retell the stories.

Science

How can we look after our environment and the living things in it?

This term we will explore the environment and learn how to care for it. We will talk about keeping our surroundings clean by litter picking and discuss why this is important. We will also think about the animals that live in our environment and how our actions can help or harm them. Through discussion, stories, and practical activities, we will learn simple ways we can look after our world.

PSHE, Enrichment & Ways to Wellbeing

How can we work and play together in school?

This term we will learn about our school and ourselves. We will talk about places in school, people who help us, and what we like to do. We will also work together in groups, taking turns, sharing, and helping each other.

Our School

Humanities

Where is it and which way do we go?

This term we will learn about position and location. We will look at where objects are - near, far, next to, or in front - and explore how to move them. We will also turn and move ourselves to understand direction and space. We will use hands-on activities, maps, and objects to help us see and understand where things are in different places.

Therapeutic Input

Alongside any physio, SaLT, and Thrive sessions we will be working to identify tools that help us regulate and build our regulation toolkits.

Numeracy & Problem Solving

This half term we will explore fractions at a basic level through practical and hands-on activities. We will learn to sort objects into equal groups such as halves and quarters, using real objects, pictures, and sharing activities. We will talk about fair sharing, compare groups, and use simple mathematical language to describe what we see as we play and learn.

Computing

How can I control what happens on the screen?

This term we will explore using technology. We will press buttons, to see what happens and try different ways to control the computer or device. We will also take turns and have a go ourselves, while exploring simple programs and apps.

Art & DT

How can we use paper and other materials to design and make buildings and artwork?

This half term we will explore paper and building materials. We will change paper by folding, cutting, and sticking to make artwork. We will look at school buildings and use Lego, Duplo, and junk modelling to design and build our own structures. We will think about which materials work best and how to join them together.

Physical Education

Can you show me different ways to move your body?

This term we will explore dance and gymnastics. We will move our bodies in different ways, learning to stretch, balance, jump, and spin. We will also copy movements, create our own, and work with others to make sequences.
