Class: Seals	Barndale Learning Plan	Term: Autumn 1

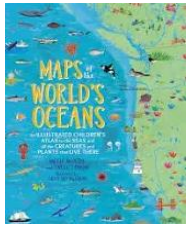

Books to support our learning.

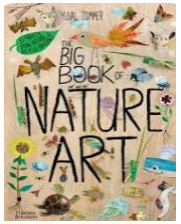

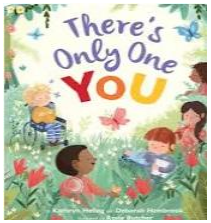

Communication, Language & Literacy

Children will develop their dictionary skills by learning how to use alphabetical order and exploring how nouns and adjectives can be used effectively in sentences. Using The BFG, they will investigate the made-up language used by Roald Dahl and create their own dictionary entries, considering why authors use invented words and how they add meaning and humour to a text. Children will apply their learning by using these words in their own sentences. Some children will also work towards their Reading and SPaG SATs, developing key skills and applying their knowledge to a range of questions. In Guided Reading, we will study 'Treasure Island', improving vocabulary skills.

Science

How do different habitats help living things to survive?

Children will learn how to identify and group living things, recognising what makes something living. They will explore different habitats and discover how plants and animals are suited to the environments in which they live. Children will investigate how habitats provide the food, water, shelter and conditions that living things need to survive. They will develop their scientific observation and classification skills through practical activities and investigations.

PSHE, Enrichment & Ways to Wellbeing

How can we work together to make our classroom a happy, safe and respectful place?

Children will explore what it means to be part of a class and wider school community, recognising that everyone has an important role to play. They will develop an understanding of rights, responsibilities and how their choices and actions can affect others. Children will practise working cooperatively, listening to different viewpoints and resolving disagreements positively. They will also build confidence in expressing their feelings, ideas and opinions respectfully.

Continents and Oceans

Humanities

How have explorers helped us to discover and understand our world?

Children will develop their understanding of the world by locating and naming the seven continents and exploring where different countries and places are found. They will learn about famous explorers and their journeys, using maps, photographs and simple geographical vocabulary to describe places. Children will develop their map skills and begin to understand how explorers have helped us learn more about our world.

Therapeutic Input

Children will work towards achieving EHCP targets daily, through our curriculum, in addition to targeted interventions covering Speech and Language, Occupational Therapy, Social and Emotional Mental Health and Sensory and Physical activities. Look out for their achievements on Tapestry.

Numeracy & Problem Solving

Children will develop their understanding of place value at a level appropriate to their individual needs. They will explore the value of digits within numbers and use this knowledge to read, write, compare and order numbers. Children will develop their confidence in working with numbers and apply their understanding to a range of practical and problem-solving activities. Some children will also be working towards their Year 6 Maths SATs, consolidating key skills and applying their mathematical knowledge to SATs-style questions.

Computing

How can we use instructions and algorithms to find our way?

Children will learn how to create and follow simple routes using digital technology. They will develop their understanding of algorithms by giving and following clear instructions to navigate a route. They will practise using directional language and begin to identify and correct mistakes in their instructions.

The Arts

How can we use art to celebrate and care for our environment?

Children will explore how artists can use natural, recycled and reused materials to create artwork. They will experiment with different textures, colours, shapes and techniques to develop their own ideas. Children will consider how art can communicate messages about caring for our environment and create their own eco-inspired artwork.

Physical Education

How can we work together, communicate and persevere to achieve our goals?

Children will develop their throwing and catching skills through a range of fun, active games and challenges, focusing on accuracy, control and teamwork. Through Commando Joe's 'The King' unit, children will develop resilience, communication, leadership and problem-solving skills through a range of team-based challenges. They will learn the importance of supporting others, persevering when challenges are difficult and working together towards a shared goal.
